About Me

Graduate with a B.S. in Computer Science - Jun 2026. I am specializing in Data Science and Data Engineering roles. For data analysis, I mainly work with **Python** (pandas, matplotlib, seaborn), **PostgreSQL** (views, joins, aggregate functions), and **Excel/Google Sheets** (pivot tables, lookup functions, dashboards). For web development, I use **Astro-HTML-JS/TS** with **TailwindCSS**. I am currently completing my degree through a thesis, which I expect to finish in August 2027.

Skills

Languages: JavaScript, Python, TypeScript, SQL

Backend: Node.js, Express, REST APIs, MongoDB

Frontend: React, Next.js, Tailwind CSS

Other tools: Git, Docker, Figma, Jira

Experience

Research Intern — DGAPA UNAM

January 2025 — June 2026

Curated documents for integration into OpenAI GPT **chatbots** and Gemini Gems. Using **Python** (Marker) and **Bash** (PDF Sandwich), I applied OCR to convert books and articles into Markdown text format, generated automatic transcripts of YouTube videos with **Python** (yt-dlp and Whisper), and created reports in **Google Sheets**.

Marketing Lead — SIAFI-UNAM

September 2023 — July 2025

Coordinated the marketing team in the **production** and publication of **social media content**. I implemented collaborative workflows, asset standardization, and a ticketing system using **Notion** and **Google Workspace**.

Note

Hi! First of all, **thank you very much for taking the time to read my CV**. If you are interested in my profile and would like to learn more about me, please **scan or click the attached QR code**. It will take you to my **Linktree**, where you will find my **web portfolio** and **GitHub** with the **projects** I have developed, my **achievements** and **certifications**, as well as my **contact information**, this CV, and everything else you may need in one place.
